A Peek Inside....

Crossing the finish line....

Congressman gives the nod....

Considering building?

Consider pre-engineered metal buildings

Our Pre-Engineered building projects come in all sizes. We have built some as small as a few thousand square feet, and others as large as eight acres under one roof," says Dick Smith, president of RE Smith Construction. "Metal buildings are flexible, durable and cost efficient."

Nixa Community Center, Nixa, Mo

An RE Smith Construction metal building system offers significant cost and performance advantages for business and manufacturing, non-profit organizations, and educational institutions when compared to conventional construction methods.

Cooper Tennis Complex,
Springfield, Mo

The **rigid frame system** makes pre-engineered buildings ideal for commercial and recreational applications by providing a **wide, column-free environment**. Steel-system construction is also **faster to build** and has lower lifecycle costs, compelling sustainability attributes, and unlimited design flexibility.

RE Smith pioneered pre-engineered buildings in the Ozark Region during the 1960s, and has built over 5,000,000 square feet of metal pre-engineered buildings in the Ozarks region since that time.

MSSU Beimdiek crosses the finish line: doors open on schedule

Beimdiek Student Center doors opened to students 6 a.m. September 2, 2009. In spite of a 45 day delayed start due to weather and unsuitable soils, the 71,000 square foot renovation/addition project finished right on schedule, according to Rodney Longenecker, Project Manager for R.E. Smith Construction Company, General Contractors for the Beimdiek project. Steve Gielt was Project Superintendent, and Bill Wedeking, of RDG Planning and Design in Des Moines, Iowa, was the architect. Project Cost: \$13.9 million

FEMA shelter gets nod from Congressman Roy Blunt at Ozark Technical College

Roy Blunt, Congressman for Southwest Missouri with John Carr, Project Superintendent, OTC FEMA Shelter

Congressman Roy Blunt praised the vision of Ozark Technical College and the work of RE Smith Construction on August 4 when he visited the Richwood Valley Campus in Christian County. The \$1.5 million shelter provides 10,000 square feet of safe space to the community in case of natural disasters. Mike Freitas, Project Manager. Completed September 2009

Marian Days celebrates 32 years of freedom with new stage

The 32nd annual Marian Days, sponsored by the Congregation of the Mother Co-Redemptrix in Carthage, Mo. enjoyed a new stage this year, built by RE Smith Construction under the leadership of Richard Nepote, Project Manager Mike Kavanagh, Project Super- intendent. .

Joplin Dental Arts: second generation chooses RE Smith Construction to build state of the art dentistry facilities

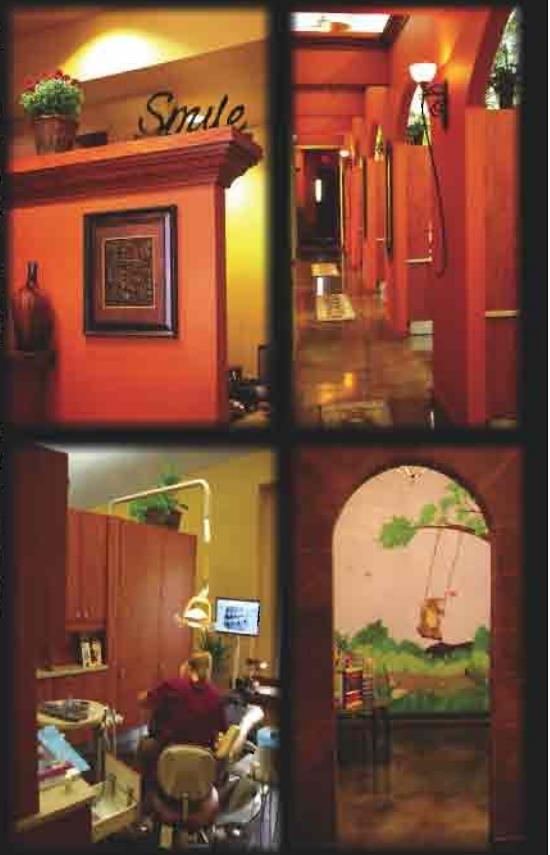

Joplin Dental Arts, 510 West 32nd Street, celebrated its new facility with a Chamber of Commerce ribbon cutting on September 24.

The dental practice, under second generation leadership with Drs. Robert Renger and Gregory Kivett Jr., was begun by the late Dr. John Sapp in 1973. Sapp and his colleagues contracted RE Smith to build their dental office in 1977, and Kivett and Renger again chose RE Smith Construction to build their 2009 facility designed for state of the art dental care.

Joplin Dental Arts features 12 operatories with intra-oral cameras, chairside monitors, a lab and sterilization areas, and attractions for children. The atmosphere is designed to relax patients, according to Dr. Renger. "RE Smith was a wonderful contractor...the entire project was managed carefully and professionally," said Megan Kivett, Office manager.

Rodney Longenecker, Project Manager,
Larry Booth, Superintendent

Wildwood Elementary Sarcoxie, Mo

12,000 square foot addition

Six new Classrooms

Old Meets New in adjoining hallway

Wildwood Elementary of Sarcoxie, Mo celebrated the addition of **six new classrooms with a ribbon cutting on August 17**, according to Mike Resa, superintendent of the Sarcoxie School system, which services 800 students, K - 12.. "The additional **12,000 square feet** of space in the new addition allowed us to add classrooms and reconfigure our existing offices and library in such a way that the entire traffic flow of the building is improved," Resa said.

The \$1,148,000 project was paid for without raising taxes, Resa said.

Clint Walton, Project Manager
Dusty Smith, Project Superintendent
